

For over 30 years, **Motor and Gear Engineering** has specialized in the design, engineering and manufacturing of gears and gearboxes, and the sales and service of AC, DC, and Servo motors, drives and generator sets. We perform reconditioning, repairs and rebuilds of gearboxes, electric motors and hydraulics. We offer full custom machine shop capabilities including CNC turning and milling and metal fabrication/welding services. We also offer consulting and field service for all our product lines. **Motor and Gear Engineering** is an EASA approved and UL listed repair center authorized by Baldor, Leeson, KSB, Flender/Siemens, Ebara, Pumpex, ABS, GE, and Franklin Miller.

**Our Mission is to provide our customers that rely on motor, gear & hydraulic systems with reliable startup & repair applications to ensure continuous production operations.** From initial project design through solving emergency issues, you can rely on **Motor and Gear** to keep you up and running. We are known for our innovative design and creative solutions in the field. We provide unsurpassed quality and customer service including 24/7 service support for breakdowns. And our preventative maintenance programs are structured to significantly reduce downtime for our customers.
