

- Turning and Milling CNC Services
- Gear Hobbing and Grinding both Internal and OD to AGMA12
- Manufacturing to Drawing Spec's or to Samples
- Reverse Engineering Capabilities
- Welding and Fabrication on ALL Types of Materials
- Shaft and Roller Repair and Build-ups – Re-chroming Services

For over 30 years, the **Motor & Gear** Machine shop has serviced the local manufacturing community with high quality repair parts and service. We operate a fully outfitted machine shop for the design, fabrication or repair of the critical components our customers need to keep their production running. From 1/4" micro gears to 15' length / 3' diameter shafts, we can service your needs for CNC turning & milling, metal fabrication & welding, and gear production up to AMGA Class 12. We offer digital product mapping / reverse engineering capabilities if necessary to duplicate your complicated parts. And our emergency pick up services are available 24 / 7.

Motor & Gear is also there for your larger projects for engineering, fabrication and installation as needed. We specialize in large hopper fabrication along with heavy duty aggregate conveyors. Contact your **Motor & Gear** sales representative for your larger project needs.
